Person with no eyes

Done with watercolour on A3 paper. The inspiration for this was a comic book done only in black and yellow. I found this particular scene in the comic and decided to do a coloured version of it.

HIPPIE MOVEMENT

Introduction
A hippie, also spelled hippy, especially in British English, is someone associated with the counterculture of the 1960s, originally a youth movement that began in the United States and spread around the world. The word hippie came from 'haster' and was used to describe someone who was 'hip' to what was going on around them. The term hippie was used in print by San Francisco writer Michael Fallon, helping popularise use of the term in the media, although the tag was seen elsewhere earlier.

The origins of the terms hip and hippie are uncertain. By the 1940s, both had become part of African American jive slang and meant 'sophisticated' currently fashionable fully up-to-date'. The word hippie was adopted by the Beat Generation. Hippies created their own subculture, which promoted pacifism and anti-war ideals, sexual revolution, and many used drugs such as marijuana and LSD to explore altered states of consciousness.

Hippie Movement

This website that I built is focused on the hippie movement. It is an informative website for anyone interested, covering general information, a photo archive and the traditions of hippie people. There is also an interactive quiz for users to try out their knowledge.
